Totally open high field MRI magnetic resonance imaging in IMTRA Incoma Madrid

You can be comfortably seated without the need for earplugs or headphones because the noise levels from the ultra modern MRI scanner in the IMTRA Incoma are extremely low.

It's fast too: a scan of the knee takes just 15 minutes.

At IMTRA Incoma we adapt to your schedule: Let us know what day and time you want to come and we will try to fit in with your availability and timetable.

MRI scanning in IMTRA Incoma clinic

Since 1990 the IMTRA Incoma medical team has served patients with musculoskeletal disorders of the extremities with diagnosis, consultation, rehabilitation, physiotherapy and surgical procedures including arthroscopy.

The incorporation of modern totally open high field MRI scanning to obtain high resolution images of limbs perfectly meets the demands of our orthopedic surgeons to complete the patient diagnosis.

IMTRA Incoma MRI scanning - Benefits for patients

- Comfortable: sitting in an armchair;

- Almost without noise: the use of headphones or earplugs is not at all necessary;
- Quick: a resonance scan of the knee in just 15 minutes;
- Without waiting list: it's highly probable that we can carry out your scan today;
- Without claustrophobia: your body does not go into the tunnel, it's just the limb to be scanned;
- Tattoos and metal implants: scans can be carried out with modern (non metal based) tattoos and metal plate implants that are in another limb not being scanned;
- The best price in Spain and subsequent consultation with the orthopedic surgeon included.

IMTRA Incoma MRI scanning - Advantages for the clinic

- It's quick: just 15 minutes for an ankle scan;
- The Patient moves less: the limb is immobilized;
- It's specific: antennas do not need to be changed for different types of scans;
- We obtain images with very high resolution for our orthopedic team;
- We can diagnose patients sooner.

Body parts that can be MRI scanned in IMTRA Incoma

With the IMTRA Incoma MRI scanner we can carry out the following resonance scans:

- Hand and fingers
- Wrist
- Elbow and forearm
- Knee
- Calf
- Ankle
- Foot and toes

These studies help diagnose problems meniscus and ligaments of the knee, ankle ligaments, patellar problems, problems with foot, toes and hands such as the scaphoid bone or triangular ligament of the wrist, tearing issues in muscles and other pathologies such as cysts, spills etc..

Children - MRI scanning in IMTRA Incoma Madrid

No need for sedation

Our MRI scanner in IMTRA Incoma is ideal for children as there is no need at all for sedation.

Parents can accompany the child

As MRI produces no harmful ionizing radiation children may be accompanied by the mother or father if it helps them to relax. The comfortable sitting position and the positioning of the member in the IMTRA Incoma MRI scanner prevents the typical mobility of children that can typically mean rescanning.

Without Risks

The IMTRA Incoma MRI scanning uses no radiation. There have been reported no side effects from the magnetic fields and radio waves.

Fully Open High Field MRI scan - Extremity MRI Scanner - Comfortable and stress-free scanning and imaging

The IMTRA Incoma clinic - Treatments with resonance results in just 48 hours.

IMTRA Incoma in its clinic in Madrid, Spain offers fully open high field MRI (Magnetic resonance imaging) which offers unparalleled picture quality and greater patient comfort. With a field of 1.0 Tesla, superior even to some closed resonances, IMTRA Incoma is able to obtain very high quality images, almost without noise, in only about 20 minutes, whilst the patient is sitting comfortably.

This fully open MRI scanner combines the latest cutting edge technology in image quality (the images obtained have a definition like a conventional closed MRI: 1 Tesla) together with maximum comfort for the patient because he or she can just sit comfortably in a chair outside the machine, and so only entering the limb to be analyzed within the receiving antenna.

IMTRA Incoma obtains very accurate images of the arm, including the elbow, wrist and hand, or of the leg, including the knee, ankle and foot getting the image quality and consistency you would get with a more powerful magnet, thanks to the patient moving less and as the antenna better fits around the joint.

Getting the immobility of the patient is most important because if they move its very likely that the scan will have to be repeated.

Same day MRI scan results and consultation

Open MRI scan and results on the same day? Yes, it's possible in IMTRA Incoma Open MRI scan and results on the same day?

Yes, it's possible in IMTRA Incoma.

It's even possible to have your appointment with the traumatologist to evaluate the results all

on the same day.

For a small additional fee avoid unnecessary additional trips. Just let us know 2 or 3 days before so we can book in your appointment for both MRI scan and consultation.

IMTRA Incoma making life easier for you.

Tattoos and prosthetics may be allowed! - Totally Open MRI extremity scanner - Imtra Incoma

Some tattoo inks may be made from metal components. Although inks today do not incorporate iron oxides, it must be taken into account that tattoos more than 20 years old or those made with homemade ink may do, meaning that normal MRI magnetic resonance scanning could result in patient burns.

MRI machines generate powerful magnetic fields that attract ferrous materials. Prostheses, piercings such as nose rings, earrings, or body piercings and metal clips produce artifacts in any resulting image, distorting the image and may also cause burns to the patient. In standard MRI scanners which have the patient lying down on a stretcher within the scanner, old tattoos or prosthesis are therefore a big problem.

However we at IMTRA Incoma are pleased to reassure our patients that one big advantage of the more modern Totally Open MRI Extremity Scanner we have in our clinic in Madrid is that because the scanner is totally open and the patient only enters the part of the body to be scanned, piercings or old tattoos in the rest of the body are not affected thus allowing totally safe MRI scanning in many more cases.

IMTRA Incoma - The latest technology for maximum patient care.

The IMTRA Incoma clinic - Fully Open High Field extremity MRI scanning - Comfortable stress-free scans and magnetic resonance imaging for arm, elbow, wrist, hand, leg, knee, ankle foot, toes in Madrid Spain

Other services provided by the IMTRA Incoma Clinic

The other services of the IMTRA Incoma clinic include:

Traumatology and Orthopedics

The Madrid Institute of Traumatology (Instituto Madrileño de Traumatología - IMTRA - Incoma) has a team of specialists led by Dr. Enrique Galindo Andújar, providing the highest level of medical services to patients in the field of orthopedic surgery and traumatology.

Arthroscopy

Arthroscopy is a minimally invasive surgical procedure. It allows us to inspect, diagnose and treat any damage to a joint. The advantages over traditional open surgery are that the joint does not have to be fully opened up.

Fully Open High Field Magnetic Resonance Imaging MRI scanning

Treatments with resonance results in just 48 hours. IMTRA Incoma in its clinic in Madrid, Spain offers fully open high field MRI (Magnetic resonance imaging) which offers unparalleled picture quality and greater patient comfort. With a field of 1.0 Tesla, superior even to some closed resonances, IMTRA Incoma is able to obtain very high quality images, almost without noise, in only about 20 minutes, whilst the patient is sitting comfortably. This fully open MRI scanner combines the latest cutting edge technology in image quality (the images obtained have a definition like a conventional closed MRI: 1 Tesla) together with maximum comfort for the patient because he or she can just sit comfortably in a chair outside the machine, and so

only entering the limb to be analyzed within the receiving antenna. IMTRA Incoma obtains very accurate images of the arm, including the elbow, wrist and hand, or of the leg, including the knee, ankle and foot getting the image quality and consistency you would get with a more powerful magnet, thanks to the patient moving less and as the antenna better fits around the joint.

HBOT Hyperbaric Oxygen Therapy

Hyperbaric medicine, also known as Hyperbaric Oxygen Therapy (HBOT), is the medical use of oxygen at a level higher than atmospheric pressure, in a hyperbaric chamber. The hyperbaric chamber that we have in our medical center, is one of the most modern monoplace chamber. It is at the disposal of athletes and patients. The medical and sports uses of the hyperbaric chamber are:

- Decompression sickness (divers, aviator, etc.)
- Treatment of sports and athletic injuries and sports performance enhancement:
 - o Prevention and treatment of injuries caused during sports and exercise;
 - o Physical preparation of the athlete, sportsman, sportswoman for high level performance;
 - o Increase exercise tolerance;
 - o Treatment of and speeded up recuperation from overtraining (when the intensity of the exercise has exceeded the recovery capacity of the athlete);
- Treatment of cases of delayed healing of wounds, fractures and other injuries;
- Carbon monoxide or cyanide poisoning;
- Sudden hearing loss, central retinal artery occlusion, ischemic encephalopathy, etc.;
- Gas gangrene.

The benefits of the hyperbaric oxygen therapy are:

- Hyper oxygenation (restoring oxygen to depleted cells and tissues);
- Help to clean toxic gases;
- Assisting in the growth of new blood vessels;
- Formation of collagen and new tissue growth;
- Enhanced white blood cell's increased ability to destroy bacteria and fungi;
- Reduce swelling, inflammation, bruising, infection, scarring and recovery time from surgery and injury.

Human Growth Factors Treatments

Treatment with growth factors specialist clinic in Madrid Spain for treatments for Chronic tendonitis, sports injuries, cartilage injuries, fibromyalgia, myofascial syndrome, fractures and degenerative joint lesions. Dr Enrique Galindo Andujar and the IMTRA Incoma clinic in Madrid Spain carries out treatments with growth factors in the following cases:

- Chronic tendinitis Being able to reverse in some cases local inflammatory processes and thus also reduce pain. It gives very good results in Achilles tendonitis, plantar fasciitis and epicondylitis (otherwise known as tennis elbow).
- Sports injuries Such as muscle or tendon injuries and ligament injuries of any joint, reducing downtimes of professional and amateur athletes, sportsmen and sportswomen.
- Cartilage injuries - Pain trigger points In conditions such as fibromyalgia or myofascial syndrome, where there is widespread muscle pain.
- Fractures Contributing positively to the consolidation of the fractured bone.
- Degenerative joint injuries Contributing positively in the case of degenerative joint injuries.

Physiotherapy and Rehabilitation

The IMTRA Incoma physiotherapy and rehabilitation center in Madrid has vast experience in this sector, achieved after 20 years of experience. The clinic works with private patients,

patients from the leading medical and mutual insurance companies in Spain and patients referred from the Spanish Social Security. All our physiotherapists are fully qualified and certified professionals and have extensive individual and group session timetable availability slots that can be adapted to best suit your professional and personal schedule.

Physio-Pilates / Pilates

For private patients we offer exclusive personalized treatment programs and now also Pilates and PhysioPilates sessions including after-work Pilates classes on weekday evenings.

Clinical Psychology

Clinical psychology, adult, child, anxiety, couple, addictive behaviors, phobias, stress, depression, low self-esteem, eating disorders, obsessions, problems of adjustment to bereavement, personality disorders, fears, jealousy, shyness, phobias, anxiety, depression, behaviour problems, social skills. Wellness and conflict resolution - Clinical psychology IMTRA Incoma's specialist psychologist José Luis Muñoz Blanco helps individuals, families and couples solve problems and resolve conflicts. His principal areas of specialisation include: • Adults: - Anxiety, phobias, stress, depression, self-esteem, eating disorders, obsessions, problems of adjustment to bereavement, personality disorders. • Children and teenagers: - Fear, jealousy, shyness, phobias, anxiety, depression, behavior problems, social skills. • Couples: - Decision-making, communication, conflict resolution, negotiation skills. • Addictive behaviour.
